The part-time program is presented in modules and takes 4 semesters.

**LANGUAGE OF INSTRUCTION**

English

**TU MEN**

TU Wien is the largest Austrian institution in research and education within the area of technology and natural sciences. The beginning of Tu Wien reaches back 250 years. Today, the university holds high international and domestic recognition in research and is a highly ranked partner of innovation-oriented enterprises. For years Tu Wien has been offering outstanding postgraduate programs and has a long tradition in continuing education. This success is also based on the top scientific and economic qualifications of its faculty. Since 1989 university programs have been running successfully.

“Due to my experience in project development, I know how important the comprehensive consideration of real estate is – both for living and working quality of the user as well as for the term value preservation. The organisation of the services required to achieve this complexity of managing buildings and facilities and have already gained professional experience in a field of work.”

**TU MEN**

As owner of a large portfolio with over 2,200 properties, our primary focus is long-term value preservation. The organisation of the services required to achieve this complexity of managing buildings and facilities is based on the knowledge gained from years of experience. The Professional Facility Management MBA programme provides the required interdisciplinary education and offers young, ambitious candidates key tools for their professional advancement.

“An increasingly competitive environment, facility management plays an important role for the success of the core business. Companies need managers who can manage real estate properties; to create the necessary infrastructure and the necessary service providers need employees who are able to complete technical expertise with management skills and to know what long-term compliance. The Professional Facility Management at Tu Wien offers exactly the know-how necessary for a facility management professional.”
Facility Managers are in great demand. They ensure the smooth running of buildings and facilities and play a crucial role for the success of the core business. Companies need managers who can manage real estate properties, their infrastructure and the necessary services in the most optimized manner. But also service providers need employees who are able to combine technical expertise with management skills and have a sound basis in facility management.

**Mohamed Drissi, Managing Director, Bundesimmobiliengesellschaft mbH**

“Due to my experience in project development, I know how important the comprehensive consideration of sustainability is. For us, combining user, technical and economic optimisation is a key factor. It’s what we call real estate management.”

**Felix Holzinger, Managing Director, Park Inn by Radisson Vienna City Centre**

“Managing a large portfolio with over 2,200 properties, our primary focus is long-term value preservation. The organisation of the services required to achieve this role is performed by facility managers. Facility management is a key factor in making right decisions. The Professional Facility Management MBA provides the necessary inter-disciplinary education and offers young, ambitious candidates key tools for their professional advancement.”

**Dipl.-Ing. Claudia Stadler**

Professor of Business Administration and member of the Austrian Fac. of Engineers and Architects, Head of the MBA Programme in Facility Management, expert in facility management.

**Dipl.-Ing. Hans-Peter Weiss**

“Facility Managers need to know and understand the technical side of facilities. This includes the knowledge about legal compliance. The Professional MBA offered by the TU Wien offers exactly the know-how necessary for a Facility Management Professional.”

**Univ.Prof. Dr. Alexander Redliss**

Director, TU Wien Facility Management Program.

**Target Group**

Designed preferably for individuals in control of budgets and personnel who are interested in deepening the understanding of this broad field. The Professional MBA is an ideal basis for successful real estate management.

**Academic Director**

Univ.Prof. Dr. Alexander Redliss

**Admission Requirements**

Admissible individuals will hold an appropriate first academic degree (e.g. an Austrian academic degree, master or bachelor degree of a foreign university or university of applied learning) on a similar qualification which can be regarded as an equivalent thereof (i.e. activities similar to those of a university graduate or relevant professional experience) and must have at least two years of professional experience.

Professional MBA Facility Management: Management Skills to boost your Career

Properties are an important cost factor for companies. Therefore, up-to-date Facility Management, such as the integrated management of buildings and facilities, is increasingly important in a highly competitive market if you want to have the leading edge. The postgraduate Professional MBA Program provides up-to-date know-how in the fields of management, engineering, law, economics, and ecology. This MBA Program will broaden your knowledge in order to achieve the best possible results in the management of your properties and facilities.

The main goal of the Professional MBA Facility Management is to transfer the management competence. In the postgraduate program knowledge and competence in the field of General Management, Real Estate, and Facility Management is imparted. Based on the interdisciplinary approach in Facility Management the postgraduate program combines operative economic competences with professional technical know-haves and has a special focus on management, legal and financial competence in the field of Facility Management. The cooperation with the IFM Institute of TU Wien ensures the immediate application of the newest results of research into the curriculum of the MBA Facility Management Program.

TU MEN

TU Wien is the largest Austrian institution in research and education within the areas of technology and natural sciences. The beginnings of TU Wien reach back 230 years. Today, the university is highly international and draws recognition in research as well as research and is a highly esteemed partner of innovation oriented enterprises. For years TU Wien has been offering outstanding postgraduate programs and has a long tradition in continuing education. This success is also based on the top scientific and economic qualifications of its Faculty. Since 1968 university programs have been running successfully TU Wien and therefore the university with the longest experience in continuing education for real estate and facility management in German-speaking countries.

The cooperation with the EM Institute of TU Wien ensures immediate application of the newest results of research into the curriculums of the MBA Facility Management Program.

TU Wien offers the largest and most varied range of courses within Austria and thus is a key player in the development and implementation of new technologies. As a university in the urban area of Vienna, TU Wien is very close to the market. Projects and courses are directly applicable to today’s problems of urban development. The cooperation with the EM Institute of TU Wien ensures the immediate application of the newest results of research into the curriculums of the MBA Facility Management Program.

TU Wien is a company in the university business. Since 2002, the university has been an independent company and is a key player in corporate services. Its core business is the provision of services to TU Wien. TU Wien offers services in all areas of university life.

ADMISSION REQUIREMENTS

Admitted individuals must hold an appropriate first academic degree (e.g. a BA or master’s degree in facility management). Admitted candidates are required to have completed at least a bachelor degree in facility management.

TARGET GROUP

The program is intended for individuals in control of budgets and personnel who are interested in mastering the complexities of managing buildings and facilities and have already gained professional experience in a field of work.

FINANCIAL AID

The Professional MBA Facility Management Program is concluded with a Master’s Thesis. The final degree “Master of Business Administration in Facility Management” is granted by TU Wien.
