Renewable Energy Systems
TU Wien I Energiepark Bruck/Leitha

Best University at Technology in Austria - TU Wien
Experienced international energy experts
Austria as centre of renewable energy in the EU
International programs with unique worldwide network
Practical and technology-oriented program
International program with unique worldwide network
Austria as center of renewable energy in the EU
Experienced international renewable energy experts
Best University of Technology in Austria - TU Wien

This master program is an outstanding opportunity to become part of an international, enthusiastic and extraordinary group of people, sharing the same interests for such a challenging topic. The experiences of this course enable us to contribute to the common goal of securing the supply of green energy at affordable prices in order to maintain our standards of living and reducing dependence on fossil fuels at the same time.

(Source: 2016 Quality of Living Ranking, Mercer)
The global economic challenge for the next decades will be the question in availability of energy resources. The dependability of supply and acceptable costs will be of vital importance for all of us in North industrialized and developing countries.

Never before has the demand for employees in this field been so high. You are required to contribute in-depth knowledge, as well as ensure your own ongoing education to stay at the forefront of technological progress. In the past few years, MSc Program “Renewable Energies Systems” participants will receive the very best preparation for the demands of sustainable energy economics. It will provide them with an opportunity to tackle critical issues in the rapidly expanding field of renewable energies and energy efficiency systems.

Our graduates will be able to add excellent to the energy myths currently underway in different positions in business and society.

• It takes project implementation specialists to plan and operate alternative energy production facilities.

• Financing institutions and governmental agencies will forecast their energy needs, as well as ensure your own ongoing education to stay at the forefront of technological progress. In the past few years, MSc Program “Renewable Energies Systems” participants will receive the very best preparation for the demands of sustainable energy economics. It will provide them with an opportunity to tackle critical issues in the rapidly expanding field of renewable energies and energy efficiency systems.

The TU Wien – located in the heart of Europe and Vienna – is the major Austrian institution in research and education within the area of technology and natural sciences. Even though the origins of the TU Wien date back more than 200 years, teaching and learning are state-of-the-art.

Energiepark Bruck/Leitha

Think Globally, Act Locally – more than 20 years of experience in the field of renewable energy.

The association Energiepark Bruck/Leitha was established in 1995 and acts as an innovation center for renewable energy, energy efficiency, and regional development. Since then a wide range of renewable energy projects have been realized. Based on Energiepark’s activities the region already reached energy autonomy in the field of power.

FURTHER PARTNERS

Guaranteed career opportunities are offered in energy departments in selected European countries.

 Contributions will be made by:
- University of West Hungary (Győr), Czech Technical University (Prague), Adam Mickiewicz University (Poznań), Ege University (Izmir), Energetski Institut Hrvoje Pozar (Zagreb), AGH-University of Science and Technology (Krakow), Université de Lorraine (Strasbourg), ApE-Agencija za prestrukturiranje energetike (Ljubljana),
- Energiepark Bruck/Leitha
- TU Wien in cooperation with Energiepark Bruck/Leitha.

The interdisciplinary part-time MSc Program is offered by the TU Wien in cooperation with Energiepark Bruck/Leitha.

TU WIEN

Technology for People – Developing Scientific Excellence and Enhancing Comprehensive Competence

The TU Wien – located in the heart of Europe and Vienna – is the major Austrian institution in research and education within the area of technology and natural sciences. Even though the origins of the TU Wien date back more than 200 years, teaching and learning are state-of-the-art.

The global economic challenge for the next decades will be the question of availability of energy resources. The dependability of supply and acceptable costs will be of vital importance for all of us—in both industrialized and developing countries.

Never before has the demand for energy in this field been so high. You are required to contribute in-depth knowledge, as well as ensure your own ongoing education to stay abreast of technological progress. In the part-time MSc Program “Renewable Energy Systems” participants will have the opportunity to specialize in the challenging and rapidly expanding field of renewable energies and energy efficiency systems.

Our graduates will be able to addressee to the energy systems currently underway in different positions in business and society.

- It takes project implementation specialists to plan and operate alternative energy production facilities.
- Financing institutions and governmental agencies will face the challenge of having to assess such projects more often and more frequently.
- Local renewable energy providers are good business opportunities in this field for the future.
- Even conventional energy providers can render a valuable contribution by integrating our neighbours in partnership towards joint projects.
Univ.Prof.Dr.techn. Reinhard Haas
Academic Director

The global economic challenge for the next decades will be the question in availability of energy resources. The dependability of supply and acceptable costs will be of vital importance for all of us - not only industrialized and developing countries. Never before has the demand for energy in this field been so high. You are required to contribute in-depth knowledge, as well as ensure your own ongoing education to stay at the forefront of technological progress. In the past few years MSc Program "Renewable Energies" participants will receive the very best preparation for the demands of sustainable energy economy. In full possession of the knowledge of an opportunity to specialize in critical roles in the challenging and rapidly expanding field of renewable energies and energy efficiency systems.

Tu Wien Technology for People - Developing Scientific Excellence and Enhancing Comprehensive Competence

The Tu Wien – located in the heart of Europe and Vienna - is the largest Austrian institution in research and education with about 18,000 students and 3,600 employees. Since the beginning of 1819, the Faculty has become an opportunity to specialize in critical roles in the challenging and rapidly expanding field of renewable energies and energy efficiency systems.

Graduates will be able to address to the energy needs currently underway in different positions in business and society.

• It takes project implementation specialists to plan and operate alternative energy production facilities;
• Financing institutions and governmental agencies will operate alternative energy production facilities;
• Contributions will be made by:

The MSc Program founders are members of this top-class faculty, based on their sound practical experience in the field of renewable energy sources.

I had the pleasure to participate in this unique program in its first matriculation year 2005. From personal maturity, most recently honored by the ASIIN accreditation. Achieving the final degree "Master of Science (MSc)" is a milestone in a student's career. BY THE WAY... With the MSc Program the participants acquire knowledge and competence for

• the design of plants for the use of renewable energy sources from economic and legal point-of-view,
• the operation of plants for the use of renewable energy sources,
• the future assessment of environmental, technical and economic developments of renewable energy systems.

TARGET GROUP

Individuals within companies, organizations, and authorities who are engaged in planning, operating or evaluation of renewable energy projects or who are involved in financing, promotion, legal licensing of facilities for the use of renewable energy or environmental issues.

ADMISSION REQUIREMENTS

Admission is open to a Baccalaureate degree, Magna’s degree, or a diploma or equivalent in the area of specialty and a minimum of 2 years of professional experience. Persons holding an equivalent educational and professional qualification may also be admitted.

The interdisciplinary part-time MSc Program is offered by TU Wien in cooperation with energiepark Bruck/austria. To train the market demand worldwide.

In this growing sector, the demand for well-founded knowledge is rapidly increasing. Since then a wide range of renewable energy projects have been realized. Based on Energiepark’s activities in the area of renewable energy research, teaching and learning are state-of-the-art.

Energiepark Bruck/austria

Think Global, Act Locally - more than 20 years of experience in the field of renewable energy systems.

The association energiepark Bruck/austria was established in 1985 and acts as an innovation center for renewable energy technologies and regional development. Since then a wide range of renewable energy projects have been realized. Based on the association’s activities the region already reached energy autonomy in the field of power.

LOCATIONS
The MSc Program is held on several locations in different countries: Vienna, Bruck/Leitha and at the sites of the country modules of selected European countries: e.g. Bratislava (Slovakia), Bucharest (Romania), Hamburg (Germany), Izmir (Turkey), Krakow (Poland), Ljubljana (Slovenia), Mosonmagyarovar (Hungary), Prague (Czech Republic), Varna (Bulgaria) and Zagreb (Croatia).

Renewables make sense ... Energize your future!
TUITION FEE
The tuition fee for the MSc Program is EUR 19,500 (VAT-free), excluding travel expenses and cost of room and board.

INFO SESSIONS
Presentations of the MSc Program will be held in the form of info sessions. During these info sessions the Academic Director, program managers and alumni provide you with in-depth information on the program and look forward to answering your questions.
