ETIA provides an interdisciplinary perspective that incorporates scientific and economic aspects of how natural processes are increasingly shaped by human influence. My bachelor's degree was in development studies, which prepared me for tackling the social issues; the ETIA program seemed like the perfect complement to prepare me for what I've always wanted to do – improve the lives of people in disadvantaged regions through the responsible use of scarce natural resources!
The two-year MSc Program embraces a wide range of topics and is divided into two distinct segments. The focus of the technical and scientific segment is on the fundamentals of environmental management and, as well as climate change. After a general introduction to international relations, the international studies segment deals with the major political, economic and legal issues concerning the environment and sustainable development.

"Research into today’s environmental challenges is critically shaping information and scientific knowledge forward. Further and further in direction where the understanding of action-reaction patterns or responsive systems is really complex. As a result, the gap between cutting-edge science and society has increased tremendously. Few people are able to bridge that gap, particularly when the socio-economic, cultural and political implications of implementing sustainable solutions or technologies have to be considered.

The MSc Program provides a unique opportunity to gain insight into both of these worlds. It is not about creating the front end of science and society, but about building a bridge between science and society.”

"The international community has set itself the ambitious goal of achieving sustainable development. Decision-makers therefore have to have a profound understanding of the legal, economic and technical issues.
"Today environmental issues range from the local to the global scale. International action is required to maintain a sustainable future for our earth."
The ETIA postgraduate MSc Program enables graduates to understand and analyze the relevant scientific and technical issues at the same time as providing them with a sound competence required for careers in the international field. Its interdisciplinary study programs aim at providing the academic expertise, personal skills and intercultural competence required for careers in the international field.

In the current and future challenges concerning the environment and sustainable development.

The Vienna School of International Studies is characterized by its international student body with representatives from as many as 40 different nations. Studies is characterized by its international student body with representatives from as many as 40 different nations.

Students have an opportunity to get an insight into both of these ‘worlds’. It is not about creating the front end and acceptable solutions are taken into account. I think that this MSc Program provides a unique opportunity for a career in diplomacy. The international community has set itself the ambitious goal of achieving sustainable development. Therefore, have to have a profound understanding of the international relations and political problems from a legal, economic, scientific and technical standpoint and take active part in implementing and managing new standards. Professional Master programs like the MSc ETIA have a strong focus on a professional career development.

**MISSION STATEMENT**

First degree in (English)

**ADMISSION REQUIREMENTS**

TOEFL (minimum 627 points (written), or 263 points (computer based) or 106 points (Internet based)).

IELTS (minimum 7.0) or

First degree in English

**LANGUAGE OF INSTRUCTION**

The MSc Program is taught in English. Optional courses may be in French or in German.

**FACULTY**

The members of the ETIA faculty are internationally renowned experts distinguished both for their profound interdisciplinary scientific knowledge and their extensive practical experience in the fields of environmental technology and international affairs.

**CURRICULUM**

The MSc Program is concluded with a master’s thesis.

**FINANCIAL SUPPORT**

The ETIA offers a number of partially-funded assistantships to qualified candidates.

**REGISTRATION **

For more information visit: www.etias.tuwien.ac.at or contact the Admissions Office at +43 1 58801 47445.

**ADDITIONAL INFORMATION**

The MSc Program is coordinated by the Vienna School of International Studies (VSIS) and the Department of Environmental Technologies and International Affairs (ETIA) at the Technical University of Vienna (TU Wien).

High-flying careers for a better environment
PROGRAM START
September 25, 2018

LOCATIONS
The MSc Program takes place on the centrally located campuses of the TU Wien and the Vienna School of International Studies.

DURATION
The MSc is presented in modules and requires two academic years. One is at TU Wien and the other at the Vienna School of International Studies. In the first academic year of the program participants must attend the international studies segment at the Vienna School of International Studies.

TUITION FEE
The fee for this two-year full-time MSc Program is EUR 25,800; this covers tuition only.

ADMISSION
To be eligible for admission to the ETIA MSc Program candidates must prove all admission requirements and run the online application procedure before the application deadline. A decision on admission to this MSc Program will be taken by the Academic MSc Program Committee by April 2018. Candidates may also be required to be available for interviews.

Applicants are carefully considered on the basis of their academic achievements and professional experience. To learn more about the admission procedure please do not hesitate to contact us.

APPLICATION
Application Deadline
March 15, 2018

Online Application Process
https://application.da-vienna.ac.at/master
1. Register
2. Fill in the online application form and upload your CV.
3. The document size of your CV must not exceed 1 MB.
4. Post copies of the following to the Vienna School of International Studies Registrar's Office: these documents (*double set* – except for the recommendation letters and photos) should reach the Registrar by 15 March 2018 at the latest:
   • CV
   • motivation letter
   • proof of competence in English (please check the requirements and the list of accepted certificates under the tag “admission“)
   • university/college diploma
   • transcript of grades
   • highschool diploma
   • copy of your passport
   • photo (passport sized)
   • two recommendation letters. These MUST be:
     • submitted by the referees to the candidate in a sealed envelope or
     • submitted by the referees directly to our registrar Mr Jonathan Krämer, LL.B. MA by postal mail.

Please send the documents (*double set* – except for the recommendation letters) listed above to:
Diplomatische Akademie Wien – Vienna School of International Studies
Jonathan KRÄMER, LL.B. MA
Favoritenstr. 15a, 1040 Vienna, Austria

*The second set of these documents is needed to register candidates who have been admitted to the ETIA programme simultaneously as students of TU Wien.

Certified Translations
The working languages of the Vienna School of International Studies are English, French and German. If your documents are not issued in one of these languages, please make sure you include certified translations with your application.
